<h2>GALAXY HOSPITAL</h2>

<p>Your health is our primary concern.</p>

</header>

<main>

<section>

<h3>Introduction</h3>

<p>A hospital is a health care institution providing patient treatment

with specialized health science and auxiliary healthcare staff and medical equipment. The

best-known type of hospital is the general hospital, which typically has an emergency

department to treat urgent health problems ranging from fire and accident victims to a sudden

illness. A district hospital typically is the major health care facility in its region, with

many beds for intensive care and additional beds for patients who need long-term care.

Specialized hospitals include trauma centers, rehabilitation hospitals, children's hospitals,

seniors' (geriatric) hospitals, and hospitals for dealing with specific medical needs such as

psychiatric treatment (see psychiatric hospital) and certain disease categories. Specialized

hospitals can help reduce health care costs compared to general hospitals. Hospitals are

classified as general, specialty, or government depending on the sources of income

received.</p>

<div class="img"><img src="hospital.jpg" alt="hospital imagee" width="20%" height="20%">

</div>

<p>A teaching hospital combines assistance to people with teaching to

health science students and auxiliary healthcare students. A health science facility smaller

than a hospital is generally called a clinic. Hospitals have a range of departments (e.g.

surgery and urgent care) and specialist units such as cardiology. Some hospitals have

outpatient departments and some have chronic treatment units. Common support units include a

pharmacy, pathology, and radiology.</p>

<p>Hospitals are typically funded by public funding, health organisations

(for-profit or nonprofit), health insurance companies, or charities, including direct

charitable donations. Historically, hospitals were often founded and funded by religious

orders, or by charitable individuals and leaders.</p>

<p>Currently, hospitals are largely staffed by professional physicians,

surgeons, nurses, and allied health practitioners, whereas in the past, this work was usually

performed by the members of founding religious orders or by volunteers. However, there are

various Catholic religious orders, such as the Alexians and the Bon Secours Sisters that

still focus on hospital ministry in the late 1990s, as well as several other Christian

denominations, including the Methodists and Lutherans, which run hospitals.

GALAXY HOSPITAL

Your health is our primary concern.

Introduction

A hospital is a health care institution providing patient treatment with specialized health science and auxiliary healthcare staff and medical equipment. The best-known type of hospital is the general hospital, which typically has an emergency department to treat urgent health problems ranging from fire and accident victims to a sudden illness. A district hospital typically is the major health care facility in its region, with many beds for intensive care and additional beds for patients who need long-term care. Specialized hospitals include trauma centers, rehabilitation hospitals, children's hospitals, seniors' (geriatric) hospitals, and hospitals for dealing with specific medical needs such as psychiatric treatment (see psychiatric hospital) and certain disease categories. Specialized hospitals can help reduce health care costs compared to general hospitals. Hospitals are classified as general, specialty, or government depending on the sources of income received.

A teaching hospital combines assistance to people with teaching to health science students and auxiliary healthcare students. A health science facility smaller than a hospital is generally called a clinic. Hospitals have a range of departments (e.g. surgery and urgent care) and specialist units such as cardiology. Some hospitals have outpatient departments and some have chronic treatment units. Common support units include a pharmacy, pathology, and radiology.

Hospitals are typically funded by public funding, health organisations (for-profit or nonprofit), health insurance companies, or charities, including direct charitable donations. Historically, hospitals were often founded and funded by religious orders, or by charitable individuals and leaders.

Currently, hospitals are largely staffed by professional physicians, surgeons, nurses, and allied health practitioners, whereas in the past, this work was usually performed by the members of founding religious orders or by volunteers. However, there are various Catholic religious orders, such as the Alexians and the Bon Secours Sisters that still focus on hospital ministry in the late 1990s, as well as several other
